

**MURAT AKIL** received the B.Sc. degree in electrical electronics engineering from the Bilecik Seyh Edebali University, Bilecik, Turkey, in 2014, and the M.Sc. degree in electrical electronics engineering from the Gazi University, Ankara, Turkey, in 2019. He is currently pursuing the Ph.D. degree in electrical electronics engineering with specialization in renewable energy resources, power management and electric vehicle charging system from the department of electrical electronics engineering, Gazi University, Ankara, Turkey. He has been department of electronics and automation in a Vocational School lecturer with Aksaray University since January 2021. His current research interest includes the role of plug-in electric vehicles in distribution grids, power system planning, integration of renewable energy resources.

Paper ID : 121

Paper Title: Analysis of Electric Vehicle Charging Demand Forecasting Model based on Monte Carlo Simulation and EMD-BO-LSTM.
