

Paper ID: 15-Simulation of a Wireless Charging Multiple E-Scooters using PV Array with Class-E Inverter Fed by PI Controlled Boost Converter for Constant Output Voltage

Authors: Fatih ISSI

Fatih ISSI received the B.Sc. and M.Sc. degrees in electrical education from Gazi University, Ankara, Turkey, in 2011 and 2013, respectively. He received Ph.D. degree in electrical and electronic engineering from Gazi University in 2021. He joined the Department of Electronics and Automation, Cankiri Karatekin University, Turkey, in 2013. His current research interests include Wireless Power Transfer, high-frequency power inverters, energy conversion and applying machine learning to power electronics applications.
