

Received the B.E. degree in Electrical Engineering from Government College of Engineering Aurangabad, India and the M.Tech. degree in Power Electronics and Power Systems from the Sardar Patel College of Engineering, Mumbai India. I am currently working toward the Ph.D. degree at Indian Institute of Technology Bombay, India. I have approximately two years of industrial experience and more than three years of academic experience. My areas of interest include power system security and stability, renewable energy integration, grid resiliency, extreme weather conditions resiliency and FACTS devices.
