

Jura ARKHANGELSKI received the engineer Diploma from the Belarusian National Technical University (BNTU-Minsk, Belarus) in 2013 and the Master's degree from University of Paris-Saclay, France. In 2021, he defended his PhD at University Paris East Creteil (UPEC), France, with topic "Self-Consumption and Building Energy Management Optimization". Actually, he is Associated Professor in the University Paris East Creteil, France. His current interests include energy transition, collective and individual self-consumption, transactive control, microgrids and intelligent day-ahead optimal power flow control, energy audit, building energy efficiency, Internet of Things (IoT) sensors and artificial intelligence.

In the CERTES laboratory he works and continues to develop with the research of multi-source multi-energy management platform "ECOCLAS" and energy efficiency and IoT platform "Smart metering leaving lab" of UPEC.
