

Mojahed Al-Tamimi, an Electrical Engineer and currently MSc student in science of Renewable Energy at King Saud University. I'm a Solar Generation Specialist at NEOM Company. I'm working on the pre-development of the utility scale PV systems and EPC Solar projects from feasibility study until the commercial operation including grid integrations to the bulk supply point activities. In addition, I'm working on the Solar measurement stations campaign for the solar irradiance and related solar/weather data. Moreover, I've delivered many distributed renewable generation projects across the kingdom of Saudi Arabia.
