

Paper ID : 37-Comparative design of a stand-alone solar energy system with socioeconomic factors

Petronela Pankovits received the Master's degree in electrical power systems from the Technical University of Cluj-Napoca, Romania in 2009, and the Ph.D. degree in electrical engineering from the University of Lille Nord France, in 2015. She is currently lecturer at Léonard de Vinci Pôle Universitaire, Research Center in Paris, France. Her fields of interest include the smartgrids and topics related to power energy management, artificial intelligence, and power systems modeling. She is involved in different R&D and industrial projects dealing with the integration of renewable sources into the smart grid, the optimal sizing and energy management of hybrid power systems.
