Data Scientist PhD
Eya Kalboussi

Paper ID : 108-Deferred Supplier Energy Amount Prediction Using Neural Network based on Switching Strategy for Resilient Smart Grid

My name is Eya Kalboussi. I was born in Tunisia on April 22, 1997. Since December 2022, I have been a first-year PhD student at the Laboratory of Computer Engineering, Production, and Maintenance (LGIPM) at the University of Lorraine. My thesis focuses on data science for efficient management of production systems of goods and services.

In September 2022, I obtained my master's degree in computer science, specialization in machine learning for data science from the Faculty of Fundamental and Biomedical Sciences at the University Paris Descartes.

In September 2021, I benefited from an Erasmus+ mobility grant and obtained dual degrees from two institutions: a bachelor's degree in Telecommunications Engineering from the National Engineering School of Tunis and a master's degree in networks and Telecommunications from the National Engineering School of Brest.

In 2018, at the end of my preparatory cycle for engineering studies, I took a national entrance exam for engineering schools, which allowed me to join the engineering program at the National Engineering School of Tunis, ranking 344th out of 1100.
