

Short Bio – Prof. Fatma Gülşen Erdinç

Fatma Gülşen Erdinç received her BSc from Bahçeşehir University in 2008, and MSc and PhD degrees from Yıldız Technical University (YTU), Turkey, in 2011 and 2022, respectively. Prof. Erdinc started her career as a Co-Owner of Ozak Engineering and Consultancy on July 2008. This company was primarily focusing on low voltage end-user in-site electrical project design and installations. Afterwards, Prof. Erdinc and her team expanded the work field to medium voltage distribution level and high voltage transmission level greater scale from the project preparation to getting permission and site installation phases. Since her decision to leave the company on January 2020 to make a radical change in her career, Prof. Erdinc has managed over 50 projects with total electrical budget of million dollars including in 12 years.

Afterwards with a commitment to enter the academy to direct her knowledge to educate engineering candidates, Prof. Erdinc left the company and finalized her PhD on Electrical Engineering with a strong publication record in a short time. In this period after leaving her work in her own company, she also worked as a project researcher in a project entitled “Assessment of maximum penetration capacity of renewable energy resources in interconnected energy hub networks” funded by TÜBİTAK – MRST Dual Support Programme (Grant No: 119N711 for Turkish side) for slightly over 1 year. On September 2022, Prof. Erdinc was elevated to Assistant Professor position in Istanbul Gelişim University. She is still working there in this position.
