**Daily Prediction of PV Power Output Using Particulate Matter Parameter with Artificial Neural Networks**

In 2010, I graduated from Kırıkkale University, Faculty of Engineering, Department of Electrical and Electronics Engineering. Between 2010 and 2012, I worked as an electrical breakdown maintenance engineer at PETLAS A.Ş. Between 2012 and 2017, I worked as an electrical-mechanical breakdown maintenance engineer at PAKPEN A.Ş. I have been working as a lecturer at Ahi Evran University since 2017. Between 2017-2020, I completed my master's degree in Nevşehir Hacı Bektaş Veli University, Department of Electrical and Electronics Engineering. I started my doctorate education at Gazi University in 2020 and I am working on power estimation in PV systems.
