

Paper ID : 4-Data-Driven Sparse Model Identification of Inverter-Based Resources for Control in Smart Grids

Bio: Dr. Javad Khazaei is an assistant professor in the Electrical and Computer Engineering (ECE) department at Lehigh University and directs the INTEGRated, Resilient, and Intelligent Energy Systems (INTEGRITY) Laboratory. Prior to joining Lehigh University in 2021, he had a joint appointment as an assistant professor at the electrical engineering department at Penn State

Harrisburg and the Architectural Engineering (AE) department (courtesy appointment) at Penn State University Park. He received a Ph.D. degree in Electrical Engineering from University of South Florida (USF) in 2016. His research interests include integration of energy storage to the grid, power system dynamic modeling and stability, microgrid operation, smart grid cybersecurity, and distributed control design for cyber-physical systems.
